Professional Summary

I am a passionate front-end developer with a strong focus on building responsive, user-friendly web interfaces. My expertise includes modern technologies like React.js, Redux, Tailwind CSS, and Bootstrap, allowing me to create clean, interactive, and performant websites. With a solid understanding of HTML5, CSS3, and JavaScript (ES6+), TypeScript. I aim to bring both aesthetic appeal and functionality to every project. I am continuously learning and refining my skills, driven by a commitment to develop intuitive digital experiences that align with user expectations and business goals.

Education

Bachelor of Computer Applications (BCA)

Asian School of Management and Technology, Nepal 2024-2028 *Current*

High School +2 (Major: Computer Science & Mathematics)

Southwestern State College, Nepal

Completed in 2023

Secured : 3.7 GPA

Certifications

Responsive Web Design Certification (300 Hours) freeCodeCamp - online

Professional Experience

Front-End Developer (Fresher)

Personal Projects

Developed responsive and accessible websites using HTML5, CSS3, JavaScript (ES6+), and modern frameworks like React.js.

Used Tailwind CSS, Bootstrap, and custom CSS to create clean and visually consistent layouts.

Implemented state management in complex components using Redux.

Collaborated with design tools like Figma to translate static designs into functional web interfaces.

Followed best practices for code structure, version control, and mobile-first development.

Technical Skills

- **Front-End Development:**
 - HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Bootstrap, Tailwind CSS, TypeScript
- **Responsive Design:**
 - Mobile-First Design, Cross-Platform Compatibility, Flexbox, Grid Layouts
- **Development Tools & Platform:**
 - GitHub, Visual Studio Code, Netlify, Vercel
- **Version Control & Deployment:**
 - Git, GitHub, Netlify CLI, Vercel Dashboard
- **Design Tools (Basic Use):**
 - Figma, Canva (for collaborating on UI mockups and assets)

Other Skills:

◦ API Integration, Component-Based Architecture, Debugging, Code Optimization,
Hosting & Deployment
